

BLOCK AXESS

VEHICLE MITIGATION SYSTEM

A safe and secure way to protect your public event from hostile vehicles.

Scan to learn more

7 MINUTE

SET-UP PROCESS

Certified to resist vehicles up to 7.5 tons

QUICK + SIMPLE

The remarkably fast assembly and disassembly process requires only one person. With a fast 7-minute setup, Block Axess can be deployed without the need for extensive manpower or time-consuming processes.

VERSATILE + CUSTOMIZABLE

Modular design allows for various sizes by simply adding components. The customizable laser-etched plates enable you to incorporate your city, event, or company's name to fit your needs.

HIGHLY SECURE

Constructed from thick, galvanized steel, Block Axess provides robust security. Its tamper-proof assembly and disassembly requires specialized tools, ensuring that the security can't be compromised.

COMPACT KIT

Unit fits securely into a compact storage kit, making it incredibly easy and convenient to store and transport.

CUSTOMIZABLE PLATES

Want to add a personal touch to your event? The customizable laser-etched plates enable you to incorporate your city's, event's, or company's name to fit your specific needs.

Certified to resist vehicles up to 7.5 tons

CERTIFICATIONS

The Block Axxess has been tested and certified according to the following standards:

- **ASTM International**
- **IWA14-1**
- **PAS68**
