after impacts

- The industry's best made drum. Reusable after multiple impacts.
- Meets or exceeds MUTCD specifications
- 18" wide & 36" high regardless of orientation
- UV inhibitors and quality colorants minimize fading from the sun's harmful rays.
- Tapered design allows stacking with or without barricade lights for easy handling and storage.
- Gentle curves throughout drum eliminate sharp edges or corners that crack and split when impacted.
- Recessed areas accommodate and protect reflective sheeting.
- Drum and base remain "snapped together" until impacted or separated for transportation and storage.
- Built-in carrying and dragging handle.
- Two mounting holes for optional barricade lights.
- 100% Recycled Rubber Base for increased durability and road grip that resists movement from passing vehicles.

PRODUCT BULLETIN

TraFFix Channelizer Drum™

TraFFix Channelizer Drum Specification

TraFFix Channelizer drum to be minimum 18" wide throughout its 36" height, regardless of orientation. "D" shape design minimizes rolling after impact. Must be NTPEP tested & meets MUTCD. Available in three variations: high density, low density, or contractor low density. Four base options: sand bag, san-fil, recycled rubber, or tire ring ballast.

Durable High Density Polyethylene stands strong in scorching summers

Reshapeable Low Density Polyethylene withstands rugged snowy winters

Delineate traffic lanes during resurfacing work

Shoulder side of road buffer

Two Mounting Holes for Optional Barricade Lights - Tapered Design allows stacking with or without barricade lights for easy handling and storage

40# Recycled Rubber Base
#18040-RUB

25# Recycled Rubber Base
#18025-RUB

25# Tire Ring Base
#18020-TRB

San-Fil Base
#18005-SFB

Sand Bag Base
#18003-A
